

TONY GEORGE

Full Stack Developer | React • TypeScript • GraphQL • Python • Data-Driven Web Development • AI-Enabled Development
+44 77690 09141 • tony.mavumkal@gmail.com • Stevenage, UK • Right to Work: UK - No sponsorship needed

PROFESSIONAL PROFILE

Senior full-stack developer with 10+ years of experience bringing particular strength and depth in the front-end. Delivered complex web applications across telematics, finance, insurance, e-commerce and healthcare domains. 4+ years of hands-on UK experience delivering production software for Radius Payment Solutions and PIMS Associates. Strong hands-on capability in **React, TypeScript, JavaScript, Python/Django, GraphQL, Node.js, AWS and Azure**, with experience in overall System designing and architecting, modernising legacy platforms, building data-rich user experiences, improving performance and supporting production delivery. Passionate about AI-enabled engineering using **Claude, GitHub Copilot and Amazon Kiro**, with a strong focus on **refining, optimising and productionising** AI-generated code. Experienced in **code review, technical documentation, CI/CD, testing, Agile/Kanban** delivery, **GDPR/HIPAA-aware** development and cross-functional collaboration.

TECHNICAL CAPABILITIES

Frontend: TypeScript • ReactJS • JavaScript • Redux • JSX • Micro Front End • SSR • AngularJS • HTML5 • CSS3 • SCSS •

Bootstrap • D3JS • Highcharts • WordPress • Responsive UI

Full Stack & APIs: Python Django • NodeJS • GraphQL • Apollo Client • REST/API integration

Version Control & Build Tools: Git • GitHub • Bitbucket • NPM • Yarn • Webpack • Gulp

Cloud & DevOps: AWS EC2/S3/CloudFront • Azure VMs/Bot Services/Storage • Docker • Jenkins • Bamboo • CI/CD

AI & Engineering: Claude • Copilot • Amazon Kiro • AI-enabled development • AI-generated code review/refinement

Quality & Delivery: Jest • Cypress • Code review • Performance optimisation • Debugging • Technical documentation

Design & Governance: Figma • Balsamiq • Draw.io • GDPR • HIPAA • Secure data handling • Stakeholder communication

Methodologies: Agile • Kanban • Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer | Radius Payment Solutions | Crewe, UK • Nov 2022 – Present

- Owned the Livemap module for Radius Velocity Fleet end to end, delivering an interactive React/GraphQL interface with heavy live fleet tracking data with Google Maps integration.
- Developed telematics module using React and Redux in Micro Front End architecture. Worked with Python Django, Apollo Client, AWS and Docker in a production product supporting fleet, fuel-card, EV charging and expense-management workflows.
- Main donor of overall system designing to migration of a large legacy application from Python Django toward React and Redux, helping modernise the user experience and codebase.
- Performed code reviews, performance optimisation, repository upgrades and technical documentation; used AI-enabled development tools to accelerate delivery while applying engineering judgement to generated code.

Senior Software Developer | PIMS Associates | London, UK • Jun 2022 – Nov 2022

- Single-handedly developed product and product-landing experiences using React and Redux. Ensured Core Web Vitals, Lighthouse scores, Bundle size reduction and Accessibility.
- Used Azure DevOps (VMs/Bot Services/Storage) to host/deploy applications and improve application performance.
- Prepared System design / architecture and built financial-insight experiences helping clients assess current performance and competitor performance using React, Redux, D3JS and Highcharts.

Senior Software Developer | UST Global • Aug 2019 – Jun 2022

- Worked across multiple modules of a configurable credit-card platform for Global Payments using React/Redux and AngularJS 6.
- Built and maintained UI functionality with React Hooks, Redux, Cypress and Jest. Performed code reviews, optimisation, troubleshooting, debugging and upgrades.
- Produced technical documentation and supported maintainable delivery across a large, integration-heavy application.

Senior Systems Engineer | Infosys • Nov 2018 – Aug 2019

- Prepared overall project architecture during discovery for a luxury e-commerce platform modernised from Oracle ATG to ReactJS.
- Delivered Server Side Rendering , SEO optimised React/Redux modules. Did code reviews, optimisation, troubleshooting, deployment and technical documentations. Maintained CI environment using Jenkins.

Software Engineer | Experion Technologies • Jul 2016 – Nov 2018

- Developed web applications using React, Typescript and Wowza streaming engine. Supported client delivery across Healthcare, Finance and Corporate portfolios.

Internship | E&Y • Jan 2016 – Jul 2016

- Software development internship. Contributed to Internal web application tools.

Trainee Software Engineer | Reflections Infosystems Pvt Ltd • Aug 2015 – Jan 2016

- Supported software development activities and built foundational experience in web application engineering.

KEY PROJECTS

Radius Velocity Fleet | Telematics & LiveMap • Nov 2022 – Present

- Delivered data-rich fleet management solution by combining React, Redux, GraphQL/Apollo Client, Python Django, AWS, Docker and Google Maps API.
- System designed and worked on live tracking UX and migration from legacy Django module toward a modern React/Redux in Micro Front End architecture.

PIMS OS | Corporate Portfolio • Jun 2022 – Nov 2022

- Single-handedly developed financial-insight experiences, helping clients assess current performance and competitor performance and developed product-landing pages, all by using React and Redux. I was the sole developer for multiple WordPress marketing sites.
- Used Azure DevOps and Azure services to host/deploy applications and improve application performance.

Boson / Global Payments | Configurable Credit-Card Platform • Nov 2019 – Jun 2022

- Developed modules across React/Redux and AngularJS 6 within a generic application configurable for multiple banking clients.
- Used Cypress and Jest for testing and supported code review, optimisation, troubleshooting and upgrades.

Bergdorf Goodman / Neiman Marcus | E-commerce Modernisation • Nov 2018 – Jul 2019

- Helped modernise a US luxury e-commerce application from Oracle ATG to ReactJS and Redux.
- Contributed to architecture during discovery, code quality, performance optimisation, debugging, deployment and technical documentation; Jenkins used for CI.

EDUCATION & ADDITIONAL INFORMATION

B.Tech, Computer Science Engineering :- University of Kerala, India - 2010 - 2014

Domains:- Telematics, Finance , E-commerce, Healthcare and Corporate portfolios.
